Commission

Mapping the UK: an analysis of social mobility across regions

A Data Explorer Tool

June 2023

Overview

- **State of the Nation: context**
- **Data explorer tool: where the idea came from, what it will do, users**
- **How it works: exploring the tool**

State of the Nation - our annual monitoring report

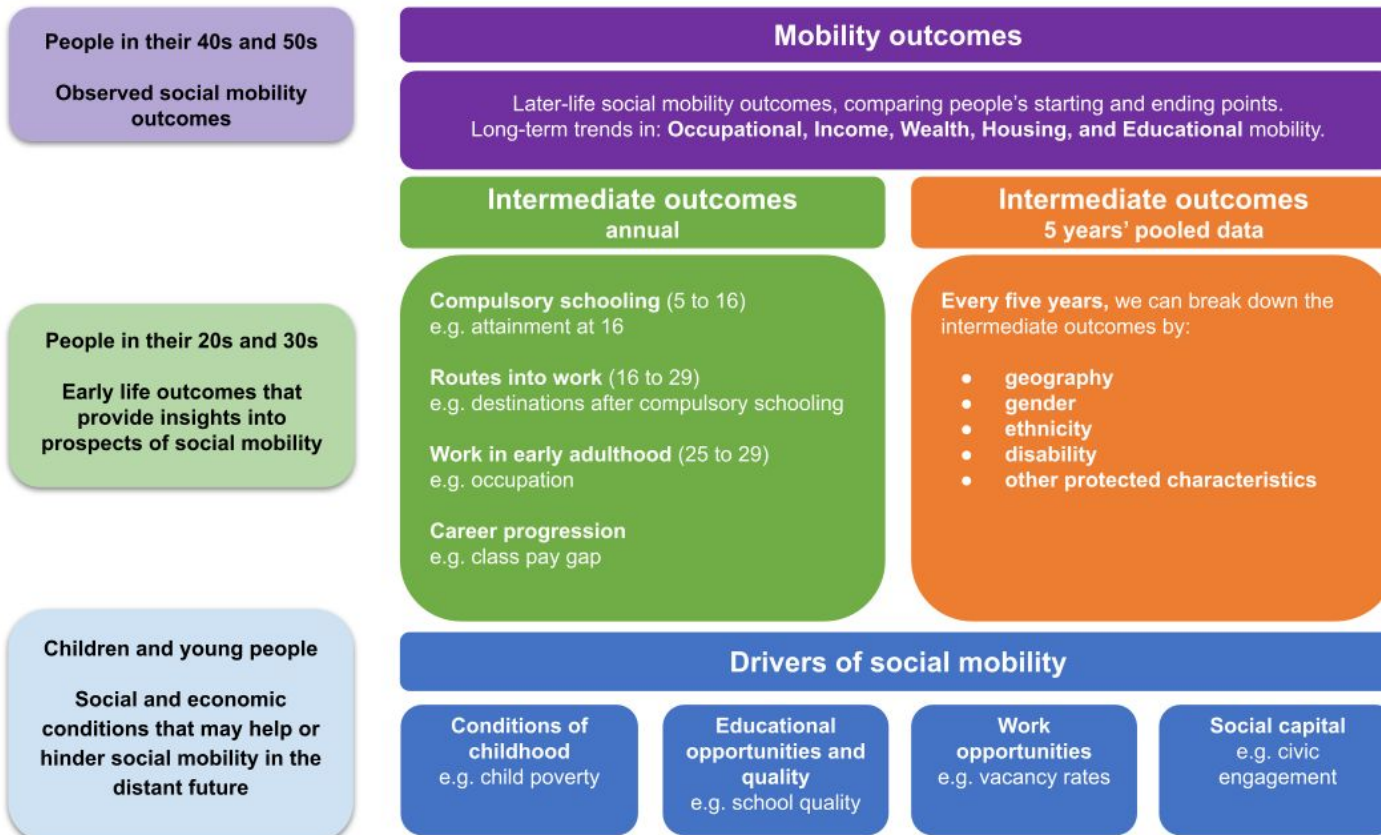

**State of
the Nation
2022:** A fresh approach
to social mobility

Published in June 2022, ***State of the Nation: A fresh approach to social mobility***, set out the new agenda for the Commission.

We introduced a **new Social Mobility Index**, which gives a more systematic way of measuring social mobility across the whole of the UK and across the life course.

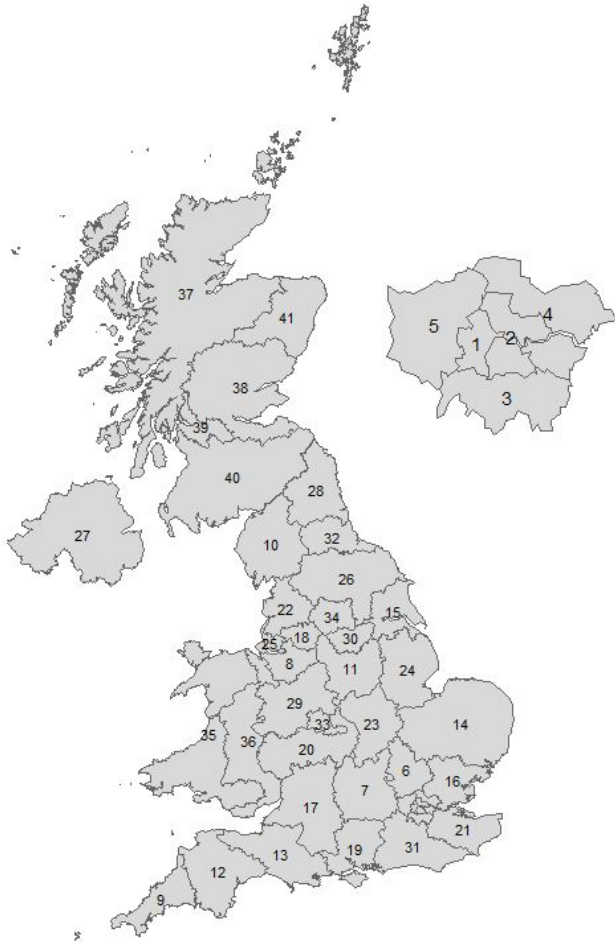

What does the new index look like?

Our new index provides, for the first time, a **systematic look at social mobility outcomes** themselves, and a critical starting point to improve the evidence base.

We focus on the mobility outcome of **occupational class**, and add further outcomes like **income, wealth, education and housing**, as the data allows.

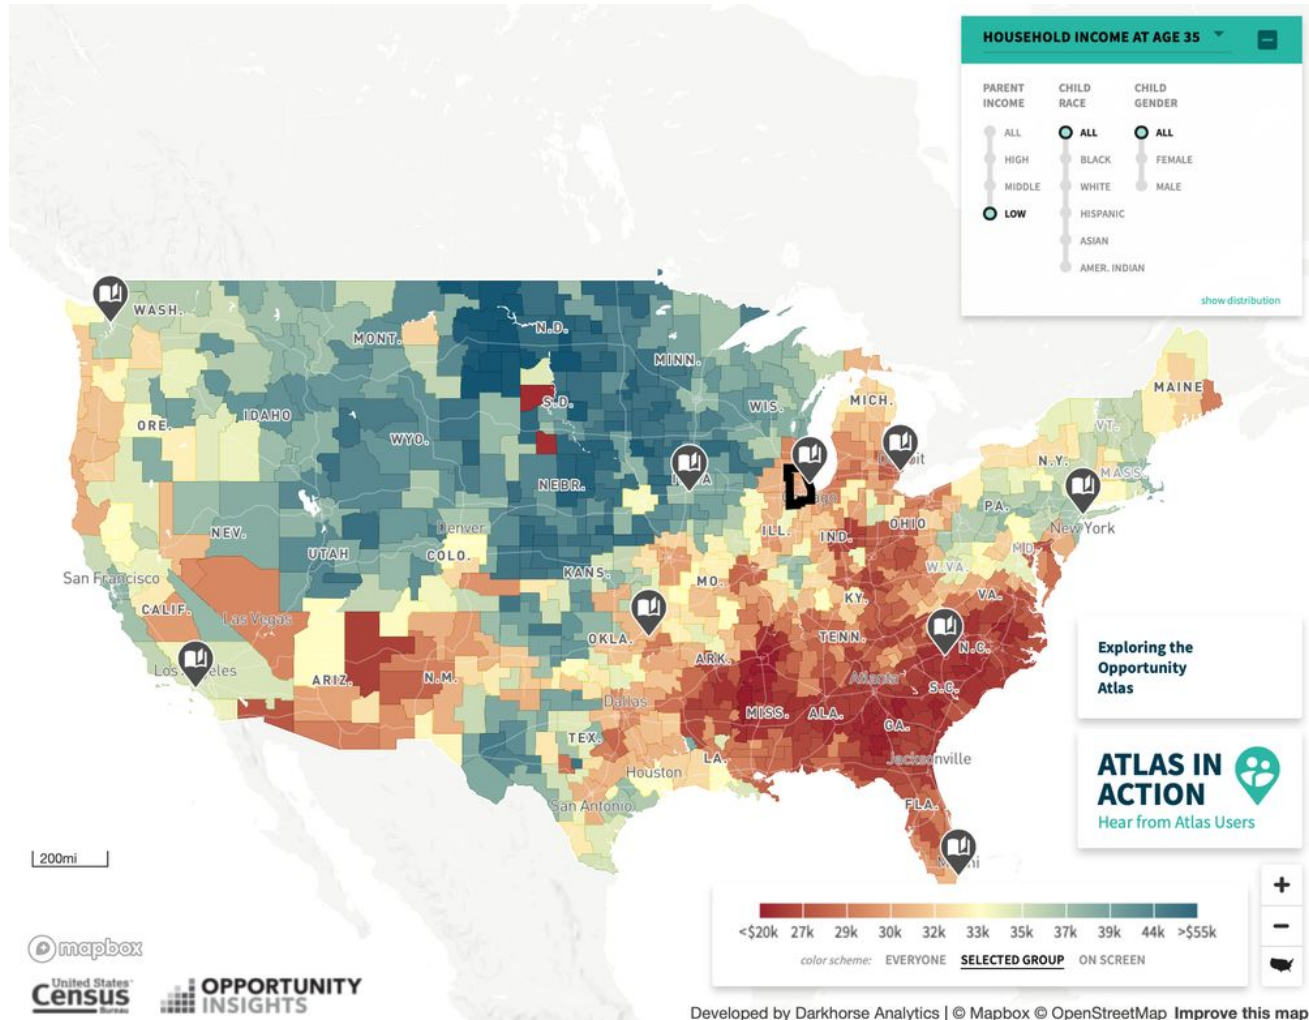

State of the Nation 2023: A focus on People and Places

We will provide a more detailed picture of social mobility in this year's report by breaking down indicators by **region and protected characteristics** (gender, ethnicity and disability status).

Our new analysis also has a **5-part division of SEB**: higher and lower professional, intermediate, and higher and lower working class.

Where did the idea for an interactive tool come from?

The idea was inspired by the American Economist, **Raj Chetty's, Opportunity Atlas** (pictured).

To our knowledge, nothing similar to this tool exists in the UK. We wanted a way to **simplify and translate** the findings from our State of the Nation report.

What does the tool do?

The data explorer tool is a collection of **interactive maps, charts and commentary** that shows social mobility measures across the UK.

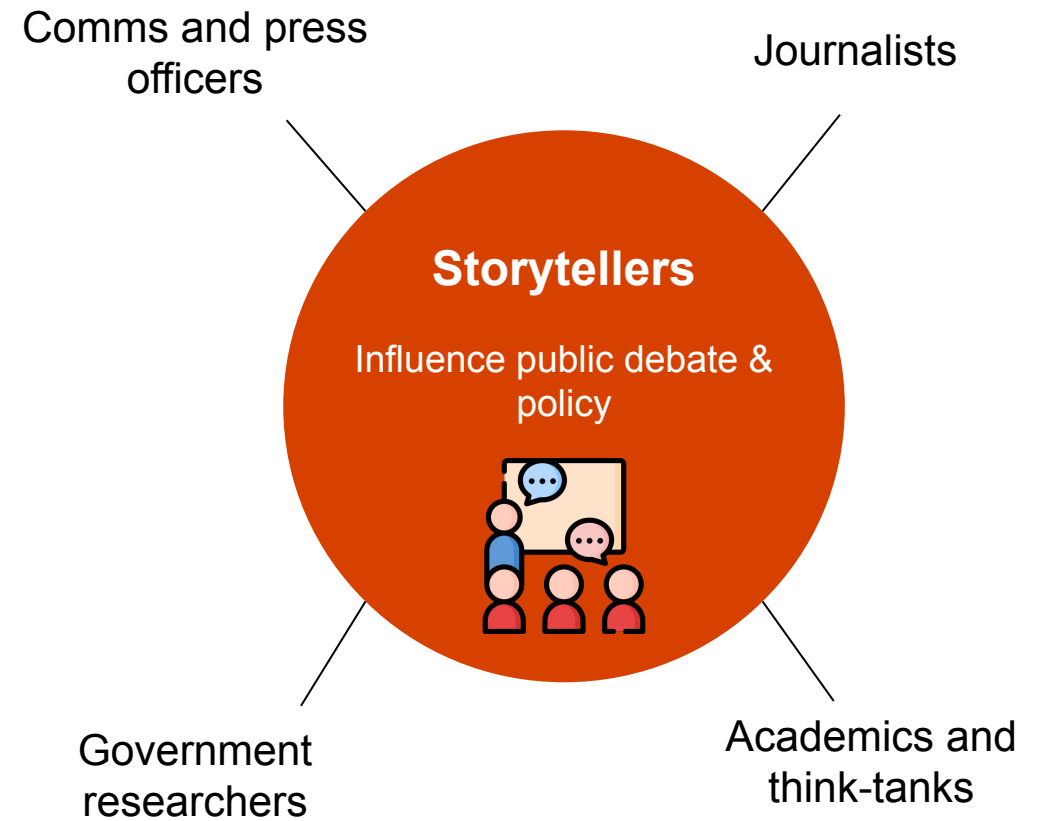

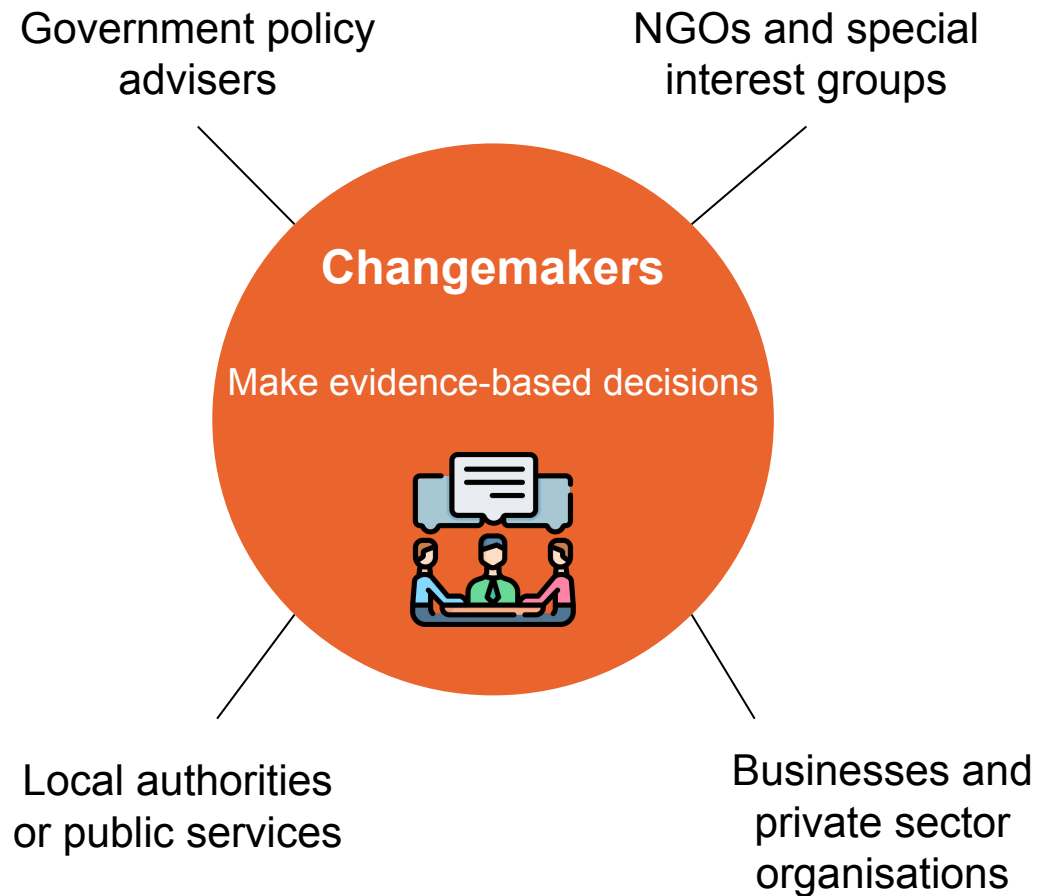

The tool presents the underlying data in a **more accessible way**, and allows users to explore the data and insights to **meet their individual needs**.

It serves as a **direct complement** to our State of the Nation report, which we will publish in the autumn. It brings the report and findings to life.

Who is it for?

How do we see this tool being used?

For changemakers

- Find insights that relate to specific area or policies
- Quickly understand what the data is showing
- Be confident that data is current, accurate and reliable
- Copy info or save charts
- Have a permalink to the source being referenced

For storytellers

- Understand what data is available (or planned)
- Easily find the data that's relevant
- Quickly get to key issues and what's important
- Check background info (e.g. methodology or sources)
- Download the data in a machine-readable format
- Compare/combine it with other data to create insights

Please note that all data used in the demonstration slides is **SIMULATED DATA and should not be used for analysis.**

State of the Nation 2023: data about social mobility in the UK

State of the Nation is an annual report into social mobility in the UK. It uses original data and analysis from the Social Mobility Commission (SMC).

State of the Nation uses the SMC's own measurement framework, the **Social Mobility Index**.

State of the Nation 2023: data about social mobility in the UK

State of the Nation is an annual report into social mobility in the UK. It uses original data and analysis from the Social Mobility Commission (SMC).

State of the Nation uses the SMC's own measurement framework, the **Social Mobility Index**.

Highlighted data

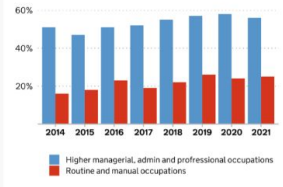

Mobility outcomes

Total occupational mobility for men aged 35 to 65 years remained stable throughout most of the 20th century.

[Read more...](#)

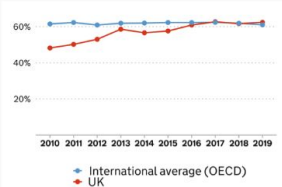

Intermediate outcomes

Men from professional backgrounds are more likely to be in professional jobs than those from working-class backgrounds, but this gap is closing.

[Read more...](#)

Drivers of social mobility

More young people aged 19 years are enrolled in education than ever before and the UK has now reached the OECD average.

Find data by region

In 2023, we have delivered on our plan to break indicators down by geography. The regions that we use are part of a system developed by the Office for National Statistics (ONS), known as International Territorial Levels (ITLs).

Composite indices

Compulsory school age (5 to 16 years)

Routes into work (16 to 29 years)

Work in early adulthood (25 to 29 years)

Career progression (35 to 44 years)

Background

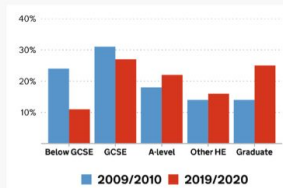

About our analysis

Intermediate outcomes

Intermediate outcomes focus on the experiences of young people as they move through education and into the labour market. They include outcomes in school, employment and career progression.

Highlighted data

Earnings

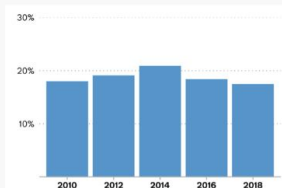

Qualification	2009/2010	2019/2020
Below GCSE	25%	10%
GCSE	30%	28%
A-level	18%	22%
Other HE	15%	18%
Graduate	15%	25%

Parents now have higher levels of qualifications than they did in 2009 to 2010.

[Read more...](#)

Economic activity

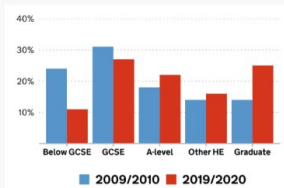

Year	Economic activity
2010	18%
2012	19%
2014	21%
2016	19%
2018	18%

We see clearer differences between women from different socio-economic backgrounds.

[Read more...](#)

Unemployment

Qualification	2009/2010	2019/2020
Below GCSE	25%	10%
GCSE	30%	28%
A-level	18%	22%
Other HE	15%	18%
Graduate	15%	25%

The term unemployment here refers to people without a job who have actively looked for work in the last 4 weeks, and are available to start work in the next 2 weeks.

[Read more...](#)

Elsewhere in State of the Nation 2023

[Mobility outcomes](#) look at where people end up, typically in their 40s or 50s. They look at people's socio-economic class, income, education and housing.

[Drivers of social mobility](#) are the background conditions that make social mobility easier.
